Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirashma et al.

Hirashima et al disclose an expression cassette (mRNA) [first strand] targeted by different micRNA [second strand] that target various regions of a bacteriophage. In Figure 1 it can be seen that fragments A, B, C, and D bind to regions of the mRNA. The mRNA clearly contains sequences that would be considered sequences that encode proteins of interest that are downstream of sequences that would be flanking sequence ie encode a target sequence/molecule. The fragment "B" binds to a 3' region of the RT and a 5' region of the Replicase genes. The prior art meets the limitations of the claims since, for example, the claims do not require that the target molecule be different from the flanking sequence and further since the B of the prior art targets two different regions of the mRNA. The claim (1) only requires that the flanking sequence contain a portion of a target sequence. There is no context in the claims that would limit the portion to, for example, one or two nucleotides of an unidentified "target molecule".

Applicant's arguments filed 9/24/04 have been fully considered but they are not persuasive. Applicants arguments are addressed in the new rejection above.

The terminal disclaimer filed 5/27/04 has been processed and entered.

Claims 2, 3, and 5-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean R McGarry whose telephone number is (571) 272-0761. The examiner can normally be reached on M-Th (6:00-4:30).
